Teacher Resources

week 4

Tip of the Week

This curriculum involves students in every step of making a garden successful at your school. This week you will lead them in selecting the garden site, and in next week's lesson they will create garden rules and develop teams with specific responsibilities to make sure that the garden is cared for well.

Balloon Hot Potato

[Balloon Hot Potato Worksheet](#)

4A. Home Sweet Home

- We hope everyone can start a garden at your home. Even a single pot full of soil could be a great garden for growing a carrot garden but how many hours of sunlight do all vegetable plants need?
- Help me finish my sentence. A good location for a garden should also _____.
- What was wrong with the shade tree locations for possible vegetable gardens?
- Raise your hand if you completed a Home Sweet Home student page. Who can tell me about a location at your home that could be a place for a garden?

4B. Great My Plate Debate

- How many food groups are there?
- Which food group is lettuce and carrots in? How about apples and blueberries?
- Name foods that are in the grains group. What are some foods that are in the grains group?
- Different food groups each have different nutrients that your body needs but which food group is most important?
